Billy THE BEAR

Director (design): Motti Eisenbach **Director of Photography (art):** Jacqui Davis

"Uhhh, hello? I was walking by about an hour ago and saw some strange movement through the window. It's late and you're closed so I thought I'd call in to warn you that someone may have broken into the place. I couldn't get a good look, but they appeared to be disguised in animatronics costumes, which seemed kind of strange."

COMPONENTS

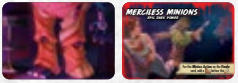

3 Finale cards

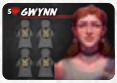

1 Epic Finale card

3 Dark Power cards

1 Epic Dark Power card

2 Final Girl cards

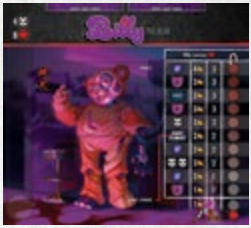

5 Buddy cards

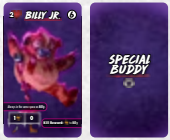

16 Terror cards

1 Killer board

2 Special Buddy cards

20 Various Tokens

SPECIAL SETUP

- Before revealing the **Setup** card, place **4 Power Source** tokens on their **Active** side, in four separate spaces so that no **Power Source** token is in a space adjacent to any other **Power Source** token. Set aside the **5th Power Source** token as it may come into play later.
- Take the two types of **Bloodlust Track** tokens (and) and shuffle them face down by type (with only the backs showing).
- Place **6 Bloodlust Track** tokens face down on the **Killer** board (in **Bloodlust** track spaces corresponding to their color and icon). The remaining **Bloodlust Track** tokens (**1** of each type) will not be used and should not be revealed.
- Shuffle the five **Buddy** cards face down to form the **Buddy** deck.
- Set aside the two **Special Buddy** cards. They may come into play later and follow the same rules as other **Buddies** once they are in play.
- Spawn a **Buddy** (see rules on **Spawning a Buddy** below).

SPECIAL RULES

BLOODLUST TRACK TOKENS

When **Bloodlust** increases to a level with a **Bloodlust Track** token, reveal the token and apply its effects.

POWER SOURCE TOKENS

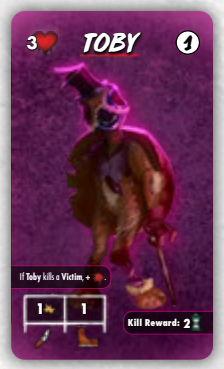

When **Deactivating** a **Power Source**, flip the token to the **Inactive** side. You may **Deactivate** a **Power Source** by spending while in the same space as the token, even if you are just moving through the space. If an **Inactive** is ever **Activated**, flip it back to the **Active** side.

RESOLVING

When you see this icon , **Billy** recovers one as long as at least one of the **Power Sources** is **Active**. Ignore this effect if none are **Active**.

BILLY'S BUDDIES

Buddies are **Minions** and follow normal **Minion** rules *(familiarize yourself with the **Minion** rules on pg. 32 of the **Core Rulebook**).*

Each **Buddy** card represents an animatronic with their own health ( ), **Attack Value** ( ), and **Movement Value** ( ).

SPAWNING A BUDDY

When an effect says to "Spawn a Buddy", reveal the top card of the **Buddy** deck. Place the card in the play area and place the indicated number of **Health** markers on top of the **Buddy** card. Place the **Buddy's** token in any space adjacent to **Billy**, choosing a space that does not already have a **Buddy** if possible.

***Note!** If **Billy** is no longer in play the effect is ignored (no **Buddy** spawns).*

ACTIVATING BUDDIES

Each **Buddy** card has an **Initiative** number found in the circle in the top right corner of the card. When resolving **Minion Actions** and/or **Terror** card effects, resolve them in the order of the **Initiative** number from lowest to highest.

***Note!** If a **Buddy** spawns during the **Killer** phase, it will not activate until the NEXT **Killer** phase.*

KILLING BUDDIES

When a **Buddy** is killed, remove the **Buddy's** token from the board. Take the **Kill Reward** indicated on the **Buddy's** card and then remove the card from the game. If a **Buddy** is killed in a phase other than the **Action** phase, take the reward at the beginning of the next **Action** phase.

ATTACKING BILLY

IMPORTANT! Buddies will protect **Billy** at all costs. This means that **Billy** cannot be attacked while there is a **Buddy** in his space.
