L'armes ✝ Abbey

Director (design): Mike Martins **Director of Photography (art):** Lars Krause

"The town of L'Armes was abandoned centuries ago. War ravaged the area countless times, to the point that locals believed the land was cursed. No one remembers how the town got its name...some claim it was because weapons had been stockpiled there during the various wars; while others claim it was due to all the weeping over the souls that have been lost. Maybe it was both, or maybe it was neither...no record exists of the origin. Ursuline nuns had the abbey built in the hopes of converting the many non-believers in the area, but the horrible events in the abbey just further reinforced their belief that the area was indeed cursed and that there was no god interested in helping them."

—Amelie Rosier, local historian

COMPONENTS

1 Location board

18 Various Tokens

10 Event cards

5 Setup cards

18 Item cards

8 Terror cards

2 Action cards

1 Blessed die

1 Cursed die

SPECIAL SETUP

- Place a **Malice** token in the **Killer's** starting space and in **3** adjacent spaces to the **Killer**. If there are only **2** adjacent spaces, then place one in the next closest space of your choice. There will be **4 Malice** tokens on the board.
- Place the **Donkey** token in the **Cloister** space.
- Place the **Benediction Action** cards in the **Action Tableau**.

SPECIAL RULES

BLESSED AND CURSED DICE

The **Blessed** die and **Cursed** die will sometimes replace the normal dice for **Horror Rolls**, impacting your chances of success, and possibly even affecting your health . When you see one of these icons, replace **1** with the corresponding die when performing **Horror Rolls**.

You will never roll both the **Blessed** and **Cursed** die in the same **Horror Roll**. If both icons are present but there are more of one kind than the other, you will replace **1** with the corresponding die. If there is an equal number of each icon, they cancel each other out and neither die is used.

Note! *The effects on the **Improvise Action** card also apply to the **5** on the **Cursed** die.*

If your final **Horror Roll** result has a icon, you lose .

MALICE

When you see the icon on a card, place a **Malice** token in the **Active Killer's** space. If that space already has a token, place it in the closest space to the **Killer** without a token.

- If there are multiple **Active Killers**, resolve this only with the **Killer** closest to you.
- If there is no **Killer** on the board when you need to place a **Malice** token, reveal a random **Setup** card and treat the space as the **Killer's** space for the purpose of resolving .

Malice tokens have a symbol so you need to replace **1** with the **Cursed** die when performing **Horror Rolls** while in spaces with **Malice** tokens.

When **Malice** tokens are removed, from playing the **Benediction Action** card or other effects, place the token back in the general pool.

Important! *You immediately lose if all **14 Malice** tokens have been placed on the board and you need to place another one.*
