SPECIAL RULES

BERITH'S POSSESSION OF URSULA

The demon **Berith** has taken corporeal form by possessing **Ursula**, a nun. He is controlling her actions and shedding innocent blood through her. The **Killer** meeple as well as the health, **Killer Attack** and **Movement Values** all represent **Ursula's** physical body possessed by **Berith.** Once possessed **Ursula** is "killed," **Berith** will leave her body.

DIVINE BLESSINGS 

When you see the  icon, place a black **Final Health** token face down on the topmost empty space on the **Divine Blessings** sheet and resolve the corresponding effect. This will be most commonly done by resolving the **Expel Demon Action** card. Divine blessings could help restore **Ursula's** life after **Berith** has been expelled from her body.

Final Health tokens on the **Divine Blessings** sheet cannot be removed or revealed unless specifically stated otherwise. The number of **Final Health** tokens is limited so there will be fewer to put on the **Divine Blessings** sheet if any are removed from the game by other effects, assigned to the **Killer**, or assigned to the **Final Girl**.

WINNING THE GAME

You must first kill possessed **Ursula** following the normal rules, including revealing the black **Final Health** token and restoring her health if necessary. Once possessed **Ursula** has been defeated, **Berith** leaves her lifeless body. To win the game, **Ursula** must come back from the dead. Reveal each **Final Health** token on the **Divine Blessings** sheet. If any show health, **Ursula's** life is restored and you win! If all of them are blank, **Ursula's** soul is condemned to hell and you lose.

***Note!** You don't need to fill the **Divine Blessing** sheet with all **7** black **Final Health** tokens before defeating possessed **Ursula**. However, the more blessings you've bestowed, the more likely she is to come back to life.*
