MORT THE TEENAGE DIRTBAG

Director (design): Evan Derrick **Director of Photography (art):** Tyler Johnson

"I saw this dude in a pig mask kill a guy! But then he, like, disappeared, and then I saw him and ripped his mask off and, like, it was my best bro Tom! And Tom was like, 'I didn't kill no one, what's your damage?' And then we saw a babe in one of those Tormentor outfits and she, like, TOTALLY killed this other babe, and we tackled her, but then it was just some kid who swore she didn't kill anyone. And I totes believed her. So, like, WHAT THE HELL IS GOING ON?"

—Eyewitness statement from a Mega Boardgame Con attendee

COMPONENTS

10 Suspect cards

3 Dark Power cards

1 Epic Dark Power card

1 Basic Finale card

10 Suspect tokens

1 **2** **3**

5 Reminder tokens

2 Final Girl cards

2 Action cards

17 Double-sided Clue cards

16 Terror cards

1 Horror Track token

1 Killer board

1 Clue Viewer

1 Suspect bag

9 Informant meeples

13 Miniatures

Note! *There is a special* ***Finale Secret Envelope*** *included with* ***Mort.***
DO NOT OPEN *it until you are instructed to! Otherwise, it will spoil the surprise.*

SPECIAL SETUP

* Place the **Basic Finale** card on the **Killer** board. It will be used for the **Killer Action** until the **Finale** is revealed.

* Add the **Interrogate** and **Coerce Action** cards to the **Action Tableau**.

* Place the **10 Suspect** cards in a row above the board with their attributes side showing.

* Place the **10 Suspect** tokens in the **Suspect** bag.

The ***10 Suspect*** *miniatures.*

* **Mort** does not start on the board. Instead, he is wearing one of **10** possible disguises. After placing the **Victims** and **Final Girl** on the **Location** board, take the **10 Suspect** miniatures and randomly place each **Suspect** on an empty space (meaning there are no other characters on the space) until there are either no empty spaces left or no **Suspects** left to place. If there are no empty spaces and **Suspects** still need to be placed, place them in the furthest spaces from you that contain **Victims**, but only **1 Suspect** per space.

* Randomly choose a **Clue** card and place it next to the board on whichever side you wish. This card determines who **Mort** will be disguised as. Place the **Clue Viewer** and the **Reminder** tokens, facedown, next to the **Clue** card.

* Place the **Horror Track** token on the **Killer** board in its designated space.

SPECIAL RULES

SUSPECTS

You are attempting to figure out who **Mort** is actually masquerading as, but until you've eliminated all **Suspects** but one, it could be anyone! There are **10 Suspects**, each dressed up as a different *Final Girl* villain. For gameplay purposes, **Suspects** are not considered the **Killer**, an **Enemy**, or a **Victim**. They will never be targeted and cannot be damaged.

Suspects have **7** attributes, listed on their respective **Suspect** card. These attributes are what will help you determine who **Mort** is actually disguised as.

REVEALING CLUES

There are two new **Action** cards: **Interrogate** and **Coerce**. These cards can be used to reveal clues to identify which of the **Suspects Mort** is NOT disguised as (see later in the rules for how these **Action** cards are used and resolved). Whenever you successfully resolve either **Interrogate** or **Coerce** and reveal a **Clue**, do the following:

1. Reveal one of the facedown **Reminder** tokens (numbered **1-5**).
2. Use the **Clue Viewer** to look at the corresponding **Clue** on the **Clue** card. It will indicate an attribute that **Mort** does NOT possess.
3. Determine which **Suspects** cannot be **Mort** by looking at their attributes and discarding their **Suspect** cards from the lineup.
4. For each **Suspect** card discarded, remove that **Suspect** miniature from the board and replace it with an **Informant** meeple.
5. Keep the **Reminder** token faceup near the **Clue** card so that you remember which **Clues** you've already seen.

Revealing a **Clue** will ALWAYS eliminate at least one **Suspect**, and may eliminate more than one.

Josie successfully resolved an Interrogate card, allowing her to look at a Clue. She flips one of the Reminder tokens: it's a 2. Using the Clue Viewer, she reads Clue #2: ***Mort's favorite genre is not comedy horror.***

Looking at the Suspect cards, she sees that comedy horror is the favorite genre of the H.U.N.T.E.R. and Baghead. Therefore, neither of them can be Mort. She discards their Suspect cards from the lineup. The Big Bad Wolf likes gothic films and Hans like slasher flicks, so their cards remain in the lineup. There's still a chance Mort could be disguised as one of them!

Josie removes the Suspect miniatures for both the H.U.N.T.E.R. and Baghead, replacing them with Informant meeples. The Big Bad Wolf and Hans, however, remain on the board.

Josie has played well and managed to reveal all 5 Clues on the Clue card! Every Suspect has been eliminated except for one: Hans. She flips the Clue card over and uses the Clue Viewer to look at the bottom line of the card. Sure enough, it's Hans, confirming that she has correctly identified Mort's disguise. She flips Hans' Suspect card over, replaces the Basic Finale card with it, and gives Mort 10 health (9 Health markers and a Final Health token). Finally, she replaces Hans' Suspect miniature with Mort's and removes all remaining Informant meeples from the board.

When you've revealed all **5 Clues** you will have correctly identified who **Mort** is disguised as! Flip the **Clue** card to its opposite side and use the **Clue Viewer** to confirm the correct disguise (located at the bottom of the card). Immediately discard any **Minor Dark Powers** in play. Next, discard any remaining **Terror** cards and replace the final remaining **Suspect** miniature (the one you correctly identified) with **Mort's** miniature. Then remove all **Informant** meeples from the **Location** board.

***Important!** When **Mort's** disguise has been revealed, don't forget to always remove any **Informant** meeples that are still on the board!*

Finally, flip over the final **Suspect** card (the **Suspect** who **Mort** is actually disguised as) and replace the **Basic Finale** card with the **Suspect** card. The **Finale** is now active. If the **Dark Power** hasn't been revealed, reveal it immediately. **Mort** immediately receives the amount of health indicated on the **Suspect** card (including a **Final Health** token).

INTERROGATE & COERCE

Interrogate can only be resolved while in a space with a **Suspect**. After successfully interrogating a **Suspect**, they will panic.

Coerce can only be resolved while in a space with an **Informant**. After successfully coercing an **Informant**, you will remove them from the board.

INFORMANTS

Informants are considered **Victims** for ALL gameplay purposes with three exceptions:

- When you save an **Informant**, after receiving the reward from your **Final Girl** card, you may then reduce **Horror** once ( ).
- If an **Informant** is killed, after increasing **Bloodlust**, you must increase **Horror** once ( ).
- When resolving or for the **Active Killer** (see below), follow normal rules but if there are ties, prioritize **Informants** over normal **Victims**.

SUSPECTS TEMPORARILY ACTING AS KILLERS

Whenever you see this icon , draw a token out of the **Suspect** bag. The token will correspond to one of the ten **Suspects**, who will then temporarily become the **Active Killer**. **Mort** is a master of disguise and distraction and could be impersonating ANYONE, if only for a moment! Place the token back into the bag after resolving the **Killer Action(s)**. That **Suspect** could become the **Active Killer** again on the same or future turn.

When drawing a token, if the indicated **Suspect** has already been proven to NOT be **Mort** (i.e., their **Suspect** card has been discarded because of a revealed **Clue** and is no longer in the lineup) nothing happens and the **Killer Action**/effect is ignored. Instead, discard the token (do not place it back in the bag).

For each **Location** card (e.g. **Terror** cards, **Event** cards, etc.) that requires you to resolve an action or an effect for the **Killer**, draw a token from the bag as if there was a icon present on the card. As long as that **Suspect's** card is still in the lineup, they will become the **Active Killer** for resolving ALL **Killer Actions**/effects on that card.

Scott has drawn EVERYBODY'S A SUSPECT during the Killer phase. The means he needs to draw a Suspect token out of the Suspect bag. He ends up drawing the Big Bad Wolf. Checking the Suspect lineup, he sees that the Big Bad Wolf has NOT been discarded yet, so Mort (briefly disguising himself in a wolf costume) will act, targeting the nearest Victim and moving to attack. After resolving the attack, Scott puts the token back into the Suspect bag.

HORROR TRACK TOKEN

When **Bloodlust** reaches the highest space on the track, remove the **Horror Track** token from the **Killer** board and place it on top of the symbol at the end of the **Horror Track** on your **Player** board. From now on, if **Horror** exceeds the maximum level, instead of increasing , you lose instead.

PANIC PHASE

Until **Mort** is revealed, **Victims** do not panic during the **Panic** phase.

RUNNING OUT OF TERROR CARDS BEFORE REVEALING ALL CLUES

If the **Finale** is revealed normally when the **Terror** deck is exhausted, flip the **Clue** card over to its opposite side and reveal who **Mort** is disguised as. Replace that **Suspect's** miniature with **Mort's** miniature and flip their **Suspect** card over, replacing the **Basic Finale** card with the **Suspect** card. Then remove any remaining **Suspect** miniatures and **Informant** meeples from the **Location** board and discard their associated **Suspect** cards. If the **Dark Power** hasn't been revealed, reveal it immediately and discard any **Minor Dark Powers** in play.

Mort then receives the amount of health indicated on the **Suspect** card (including a **Final Health** token) and will also receive a special bonus based on how many unrevealed **Clues** there were. Place one of the **Reminder** tokens (numbered 1-5) on top of the **Suspect** card to help remember how many **Clues** were unrevealed.

MINOR DARK POWERS

Some **Locations** may have **Minor Dark Powers** that have spaces for **Health** markers on them. If one of these is drawn, do not place **Health** markers on it, as Mort cannot be attacked while he is disguised. **Minor Dark Power** cards that are drawn in this way may be discarded when you successfully resolve an **Interrogate** or a **Coerce Action** card with .
